

SAP JOB DESCRIPTIONS

L2/L3 Support and Implementation Roles

Experience: 4-5 years of core relevant experience

Mandatory	SAP HANA / S/4HANA experience
Work Model	Work from office
Shift	Ready to work in a 24/7 support environment
Availability	Immediate joiners only
Background	L2/L3 support or implementation experience, with UFT experience

Roles included: SAP EWM, SAP EHS, S/4HANA PP, S/4HANA FICO, S/4HANA SD, SAP MDG, SAP BPC and SAP Security

01 SAP EWM Consultant

Job Description

Experience	4-5 years core relevant experience	Work Model	Work from office
Shift	24/7 readiness required	Joining	Immediate joiners only
Engagement	L2/L3 Support / Implementation	Automation	UFT experience required

Role Summary

- We are looking for an experienced SAP EWM Consultant with 4-5 years of core relevant experience to support critical SAP operations and/or implementation programs.
- Experience in SAP HANA / SAP S/4HANA is mandatory. The candidate must be ready to work from office in a 24/7 shift environment and must be available to join immediately.

Key Responsibilities

- Provide L2/L3 application support for SAP Extended Warehouse Management, including incident analysis, root-cause identification, resolution, and service restoration.
- Configure and support inbound, outbound, internal warehouse, picking, packing, staging, replenishment, physical inventory, and RF processes.
- Monitor interfaces and integrations with SAP S/4HANA/ECC, MM, SD, PP, TM, automation systems, and third-party logistics platforms.
- Support enhancements, change requests, testing, cutover, hypercare, and production stabilization for EWM implementations or rollouts.
- Prepare functional specifications, test scenarios, support documentation, knowledge articles, and handover material.

Mandatory Skills and Experience

- Strong hands-on knowledge of SAP EWM configuration and warehouse execution processes.
- Experience in embedded or decentralized EWM and integration with core logistics modules.
- Hands-on UFT experience for functional/regression test automation and validation.
- Strong troubleshooting, stakeholder communication, documentation, and shift handover skills.
- Demonstrated L2/L3 support experience or end-to-end implementation experience, including incident, problem, change, testing, and release activities.
- 4-5 years of core, hands-on experience in the relevant SAP module.

Candidate Expectations

- Willingness to work from office and support rotational shifts, including nights, weekends, or holidays based on project requirements.
- Strong ownership, analytical thinking, communication, documentation, and customer-handling skills.
- Ability to collaborate with functional, technical, testing, infrastructure, business, and vendor teams.
- Immediate availability to join is mandatory.

02 SAP EHS Consultant

Job Description

Experience	4-5 years core relevant experience	Work Model	Work from office
Shift	24/7 readiness required	Joining	Immediate joiners only
Engagement	L2/L3 Support / Implementation	Automation	UFT experience required

Role Summary

- We are looking for an experienced SAP EHS Consultant with 4-5 years of core relevant experience to support critical SAP operations and/or implementation programs.
- Experience in SAP HANA / SAP S/4HANA is mandatory. The candidate must be ready to work from office in a 24/7 shift environment and must be available to join immediately.

Key Responsibilities

- Provide L2/L3 support or implementation services across SAP Environment, Health and Safety processes.
- Configure and support incident management, risk assessment, occupational health, product safety, dangerous goods, and compliance processes as applicable.
- Analyze functional issues, resolve production incidents, coordinate defect fixes, and support regulatory or business-driven enhancements.
- Work with cross-functional teams for integration with MM, SD, PP, QM, HR, and S/4HANA processes.
- Develop test cases, execute regression cycles, maintain functional documentation, and support releases and audits.

Mandatory Skills and Experience

- Strong functional understanding of SAP EHS processes and relevant master/transaction data.
- Experience with S/4HANA-based EHS solutions and associated integrations.
- Hands-on UFT experience for functional/regression test automation and validation.
- Ability to manage priority incidents in a 24/7 support environment.
- Demonstrated L2/L3 support experience or end-to-end implementation experience, including incident, problem, change, testing, and release activities.
- 4-5 years of core, hands-on experience in the relevant SAP module.

Candidate Expectations

- Willingness to work from office and support rotational shifts, including nights, weekends, or holidays based on project requirements.
- Strong ownership, analytical thinking, communication, documentation, and customer-handling skills.
- Ability to collaborate with functional, technical, testing, infrastructure, business, and vendor teams.
- Immediate availability to join is mandatory.

03 SAP S/4HANA PP Consultant

Job Description

Experience	4-5 years core relevant experience	Work Model	Work from office
Shift	24/7 readiness required	Joining	Immediate joiners only
Engagement	L2/L3 Support / Implementation	Automation	UFT experience required

Role Summary

- We are looking for an experienced SAP S/4HANA PP Consultant with 4-5 years of core relevant experience to support critical SAP operations and/or implementation programs.
- Experience in SAP HANA / SAP S/4HANA is mandatory. The candidate must be ready to work from office in a 24/7 shift environment and must be available to join immediately.

Key Responsibilities

- Provide L2/L3 support or implementation services for Production Planning and manufacturing processes in SAP S/4HANA.
- Configure and support demand management, MRP, BOM, work centers, routings, production orders, capacity planning, confirmations, and shop-floor execution.
- Troubleshoot integration issues across MM, SD, QM, EWM, PM, CO, and external manufacturing systems.
- Support fit-gap analysis, solution design, configuration, unit testing, UAT, cutover, hypercare, and continuous improvement.
- Create functional specifications, test scripts, process documentation, and knowledge-transition material.

Mandatory Skills and Experience

- Mandatory hands-on SAP S/4HANA PP experience.
- Strong understanding of discrete or process manufacturing and end-to-end planning flows.
- Hands-on UFT experience for functional/regression test automation and validation.
- Exposure to Fiori applications, interfaces, batch jobs, and production support monitoring.
- Demonstrated L2/L3 support experience or end-to-end implementation experience, including incident, problem, change, testing, and release activities.
- 4-5 years of core, hands-on experience in the relevant SAP module.

Candidate Expectations

- Willingness to work from office and support rotational shifts, including nights, weekends, or holidays based on project requirements.
- Strong ownership, analytical thinking, communication, documentation, and customer-handling skills.
- Ability to collaborate with functional, technical, testing, infrastructure, business, and vendor teams.
- Immediate availability to join is mandatory.

04 SAP S/4HANA FICO Consultant

Job Description

Experience	4-5 years core relevant experience	Work Model	Work from office
Shift	24/7 readiness required	Joining	Immediate joiners only
Engagement	L2/L3 Support / Implementation	Automation	UFT experience required

Role Summary

- We are looking for an experienced SAP S/4HANA FICO Consultant with 4-5 years of core relevant experience to support critical SAP operations and/or implementation programs.
- Experience in SAP HANA / SAP S/4HANA is mandatory. The candidate must be ready to work from office in a 24/7 shift environment and must be available to join immediately.

Key Responsibilities

- Provide L2/L3 support or implementation services for Finance and Controlling processes in SAP S/4HANA.
- Configure and support General Ledger, Accounts Payable, Accounts Receivable, Asset Accounting, Bank Accounting, Cost Center Accounting, Profit Center Accounting, and internal orders.
- Analyze posting, interface, period-end, reconciliation, tax, payment, and reporting issues and drive timely resolution.
- Support integration with MM, SD, PP, HCM, Treasury, Group Reporting, and external financial systems.
- Participate in testing, data validation, cutover, month-end support, hypercare, documentation, and knowledge transition.

Mandatory Skills and Experience

- Mandatory hands-on SAP S/4HANA FICO experience, including Universal Journal concepts.
- Strong knowledge of finance controls, reconciliations, and cross-module integration.
- Hands-on UFT experience for functional/regression test automation and validation.
- Ability to support critical period-end activities in a 24/7 model.
- Demonstrated L2/L3 support experience or end-to-end implementation experience, including incident, problem, change, testing, and release activities.
- 4-5 years of core, hands-on experience in the relevant SAP module.

Candidate Expectations

- Willingness to work from office and support rotational shifts, including nights, weekends, or holidays based on project requirements.
- Strong ownership, analytical thinking, communication, documentation, and customer-handling skills.
- Ability to collaborate with functional, technical, testing, infrastructure, business, and vendor teams.
- Immediate availability to join is mandatory.

05 SAP S/4HANA SD Consultant

Job Description

Experience	4-5 years core relevant experience	Work Model	Work from office
Shift	24/7 readiness required	Joining	Immediate joiners only
Engagement	L2/L3 Support / Implementation	Automation	UFT experience required

Role Summary

- We are looking for an experienced SAP S/4HANA SD Consultant with 4-5 years of core relevant experience to support critical SAP operations and/or implementation programs.
- Experience in SAP HANA / SAP S/4HANA is mandatory. The candidate must be ready to work from office in a 24/7 shift environment and must be available to join immediately.

Key Responsibilities

- Provide L2/L3 support or implementation services for Order-to-Cash processes in SAP S/4HANA.
- Configure and support sales orders, pricing, availability checks, delivery, shipping, billing, returns, credit management, and output processes.
- Troubleshoot integration issues across MM, EWM, FI, PP, TM, GTS, and third-party sales or logistics systems.
- Support solution design, configuration, interfaces, enhancements, testing, cutover, hypercare, and production stabilization.
- Prepare functional specifications, test scripts, process documentation, and knowledge articles.

Mandatory Skills and Experience

- Mandatory hands-on SAP S/4HANA SD experience.
- Strong understanding of end-to-end Order-to-Cash and pricing procedures.
- Hands-on UFT experience for functional/regression test automation and validation.
- Experience with Fiori applications, IDocs/interfaces, output management, and production support.
- Demonstrated L2/L3 support experience or end-to-end implementation experience, including incident, problem, change, testing, and release activities.
- 4-5 years of core, hands-on experience in the relevant SAP module.

Candidate Expectations

- Willingness to work from office and support rotational shifts, including nights, weekends, or holidays based on project requirements.
- Strong ownership, analytical thinking, communication, documentation, and customer-handling skills.
- Ability to collaborate with functional, technical, testing, infrastructure, business, and vendor teams.
- Immediate availability to join is mandatory.

06 SAP MDG Consultant

Job Description

Experience	4-5 years core relevant experience	Work Model	Work from office
Shift	24/7 readiness required	Joining	Immediate joiners only
Engagement	L2/L3 Support / Implementation	Automation	UFT experience required

Role Summary

- We are looking for an experienced SAP MDG Consultant with 4-5 years of core relevant experience to support critical SAP operations and/or implementation programs.
- Experience in SAP HANA / SAP S/4HANA is mandatory. The candidate must be ready to work from office in a 24/7 shift environment and must be available to join immediately.

Key Responsibilities

- Provide L2/L3 support or implementation services for SAP Master Data Governance processes.
- Configure and support governance models, change requests, workflow, validations, derivations, duplicate checks, data quality, replication, and approval processes.
- Support master data domains such as Business Partner, Customer, Supplier, Material, and Finance based on project needs.
- Troubleshoot workflow, replication, integration, authorization, and data consistency issues across SAP S/4HANA and connected systems.
- Support testing, data migration/cleansing, cutover, hypercare, documentation, and stakeholder coordination.

Mandatory Skills and Experience

- Mandatory hands-on experience with SAP MDG on SAP HANA/S/4HANA.
- Strong knowledge of BRFplus, workflow, DRF, data models, and integration concepts.
- Hands-on UFT experience for functional/regression test automation and validation.
- Strong analytical ability for master-data quality and production issue resolution.
- Demonstrated L2/L3 support experience or end-to-end implementation experience, including incident, problem, change, testing, and release activities.
- 4-5 years of core, hands-on experience in the relevant SAP module.

Candidate Expectations

- Willingness to work from office and support rotational shifts, including nights, weekends, or holidays based on project requirements.
- Strong ownership, analytical thinking, communication, documentation, and customer-handling skills.
- Ability to collaborate with functional, technical, testing, infrastructure, business, and vendor teams.
- Immediate availability to join is mandatory.

07 SAP BPC Consultant

Job Description

Experience	4-5 years core relevant experience	Work Model	Work from office
Shift	24/7 readiness required	Joining	Immediate joiners only
Engagement	L2/L3 Support / Implementation	Automation	UFT experience required

Role Summary

- We are looking for an experienced SAP BPC Consultant with 4-5 years of core relevant experience to support critical SAP operations and/or implementation programs.
- Experience in SAP HANA / SAP S/4HANA is mandatory. The candidate must be ready to work from office in a 24/7 shift environment and must be available to join immediately.

Key Responsibilities

- Provide L2/L3 support or implementation services for SAP Business Planning and Consolidation solutions.
- Configure and support planning, budgeting, forecasting, consolidation, reporting, business rules, controls, data loads, and process flows.
- Monitor data packages, interfaces, batch jobs, calculations, eliminations, and period-close activities and resolve issues within agreed service levels.
- Work with Finance, BW, FICO, Group Reporting, and technical teams to deliver enhancements and stable operations.
- Support testing, release deployment, cutover, month-end/quarter-end activities, documentation, and knowledge transition.

Mandatory Skills and Experience

- Mandatory SAP HANA experience and strong hands-on SAP BPC knowledge.
- Experience with BPC Standard or Embedded and integration with BW/FICO.
- Hands-on UFT experience for functional/regression test automation and validation.
- Ability to support business-critical planning and close cycles in shifts.
- Demonstrated L2/L3 support experience or end-to-end implementation experience, including incident, problem, change, testing, and release activities.
- 4-5 years of core, hands-on experience in the relevant SAP module.

Candidate Expectations

- Willingness to work from office and support rotational shifts, including nights, weekends, or holidays based on project requirements.
- Strong ownership, analytical thinking, communication, documentation, and customer-handling skills.
- Ability to collaborate with functional, technical, testing, infrastructure, business, and vendor teams.
- Immediate availability to join is mandatory.

08 SAP Security Consultant

Job Description

Experience	4-5 years core relevant experience	Work Model	Work from office
Shift	24/7 readiness required	Joining	Immediate joiners only
Engagement	L2/L3 Support / Implementation	Automation	UFT experience required

Role Summary

- We are looking for an experienced SAP Security Consultant with 4-5 years of core relevant experience to support critical SAP operations and/or implementation programs.
- Experience in SAP HANA / SAP S/4HANA is mandatory. The candidate must be ready to work from office in a 24/7 shift environment and must be available to join immediately.

Key Responsibilities

- Provide L2/L3 support or implementation services for SAP security, roles, and authorizations across SAP S/4HANA and related applications.
- Design, build, test, and maintain single/composite roles, authorization objects, user access, Fiori catalogs/spaces/pages, and segregation-of-duties controls.
- Analyze access incidents using relevant traces and authorization checks, coordinate remediation, and ensure timely closure.
- Support user provisioning, role redesign, audits, compliance reviews, GRC integration, transports, upgrades, cutover, and hypercare.
- Maintain security documentation, control evidence, operational procedures, and knowledge-transition material.

Mandatory Skills and Experience

- Mandatory SAP HANA/S/4HANA security experience.
- Strong knowledge of PFCG, SU24, authorization concepts, Fiori security, and audit controls.
- Hands-on UFT experience for functional/regression test automation and validation.
- Exposure to SAP GRC Access Control, emergency access, and production support operations.
- Demonstrated L2/L3 support experience or end-to-end implementation experience, including incident, problem, change, testing, and release activities.
- 4-5 years of core, hands-on experience in the relevant SAP module.

Candidate Expectations

- Willingness to work from office and support rotational shifts, including nights, weekends, or holidays based on project requirements.
- Strong ownership, analytical thinking, communication, documentation, and customer-handling skills.
- Ability to collaborate with functional, technical, testing, infrastructure, business, and vendor teams.
- Immediate availability to join is mandatory.
